Keyboard defaults and camera editing controls · Desktop reference

Playback and navigation

KEY	ACTION	DETAIL
Space	Play / pause	Toggles playback; restarts when playback has reached the end.
Comma / Period	Step one frame	Move one recorded frame backward / forward.
Left / Right	Seek	Jump 5 seconds backward / forward.
[/]	Playback speed	Reduce / increase playback speed.
Home	Restart	Return to the beginning of the replay.
1–8	Watch player	Switch the viewed player to that player slot.

Playback bindings can be changed in Settings. The guide inside Replay Studio reflects your current bindings.

Camera controls

KEY	ACTION	DETAIL
F	Toggle free camera	Switch between free camera and first person.
C	Chase / first person	Toggle between chase and first person.
O	Orbit camera	Use the orbit camera.
B	Add keyframe	Save the current camera pose at the current replay frame.
N	Next keyframe	Select and jump to the next saved camera keyframe.
Delete	Remove selected key	Deletes the selected keyframe. Select a key on the timeline first.
- / =	FOV	Decrease / increase field of view by 5 degrees.
; / '	Roll	Tilt the camera by 5 degrees left / right.
W / A / S / D	Move camera	Move forward, left, backward, right in free camera.
E / V	Move vertically	Move up / down.
Shift	Move faster	Hold while moving the free camera.
Arrow keys	Look around	Rotate the free camera while gameplay has focus.

Editing tip Click a camera marker on the timeline, or use PREVIOUS KEY / NEXT KEY. Adjust the camera and lens, then choose UPDATE SELECTED. This edits the chosen key without lining up the playhead.

Preview and controller

Focus, timeline and gamepad shortcuts for Replay Studio

Embedded camera preview
